

## **End of Life (EOL) Notification**

<b>Products:</b>	DiskOnChip PIK	<b>Marketing update #:</b>	EOL0100
<b>Subject:</b>	End Of Life	<b>Date:</b>	May 31, 2000

### **Description:**

Affective immediately, M-Systems is announcing today the End Of Life of the DiskOnChip-PIK product.

### **Reason for the change:**

- 1) DiskOnChip-PIK does not support new DiskOnChip products.
- 2) DiskOnChip-PIK requires an ISA bus and jumper setting, which makes it incompatible with PnP computers.
- 3) The speed of the PIK is too slow for today's high capacities.

### **M-Systems' alternative product solutions:**

Use the following alternative products to test or program DiskOnChip devices:

- Evaluation Board: DiskOnChip-EVB
- GANG Programmer: DiskOnChip-GANG

Please contact your M-Systems' representative, or refer to M-Systems' web site ([www.m-sys.com](http://www.m-sys.com)), for further information on the DiskOnChip family of products.
